Opis produktu

Discover the first ever realistically shaped bullet vibrator. Sculpted to perfection from innovative Flexiskinâ„˘ liquid silicone, this hyper-realistic bullet vibrator feels like the real thing and packs a powerful punch. Shaftâ€™s proprietary Flexiskinâ„˘ liquid silicone gives the Shaft Bullet an irresistibly soft and silky real feel, while 8 powerful vibration modes and the signature boost function gives you all the good vibrations you need. Realistically shaped bullet vibrator 8 Vibration modes Boost function Length: 4.3 inch / 10,9 cm Width: 1.3 inch / 3,3 cm Rechargeable Charge time: Approx. 1.5 hours Run time: Approx. 1 hour at highest setting 100% Waterproof Innovative Flexiskinâ„˘ feels just like skin: soft, squeezable, and flexible. This uniquely formulated liquid silicone is not only extremely soft and pleasing to the touch, but also hypo-allergenic and non-porous, so bacteria canâ€™t become trapped in it. This makes Shaft highly realistic and completely safe for the body. Underneath the layer of Flexiskinâ„˘ is a firm silicone core. This allows Shaft to be sturdy and springy. The layers are merged together perfectly and the exceptional quality of the premium materials and manufacturing guarantee durability of the dildo. Another unique feature of Shaft is the naturalistic dual colour of the dildo. The soft head differs in colour from the shaft. Such coloration makes the dildo unbelievably realistic.
