Opis produktu

After the success of the first series, the Cloneboy team developed a complete new Cloneboy series, which includes a cockring and extra moulding material for an extra reproduction which guarantees you a high quality silicone 3D-replication of your penis. Suitable for all penises.

The Cloneboy Cast Your Own Dildo Suction kit contains all the necessary items to make a silicone rubber copy of your penis either alone, or together with your partner. The Cloneboy contains no adhesive that can irritate the skin and uses a medically tested moulding material made from natural algae.

The simplicity of the kit enables you to create your own Clone in a few easy steps with perfect results every time. Unlike other kits, all Cloneboy kits contain enough impression material to make 2 moulds. You will always have a second chance to make a good impression of your penis. A lasso cock ring ensures you keep an erection during the moulding process.
