Opis produktu

This cock ring with remote control butt plug is a combined cock/ball ring with a securely attached vibro-butt plug. The plug can be easily controlled via the remote control. The combined rings hold the penis and testicles securely and can support the erection effectively because of the blood congestion effect. The inserted butt plug with its special curved design and 12 different thumping and vibration modes that will provide intense backdoor stimulation. It is covered in silicone that has a soft touch texture which feels great against the skin. Makes the penis strong and pleasures his backdoor at the same time!
