Opis produktu

Power in the front, pleasure in the back!
The Cock and Ball Ring with RC Butt Plug from Rebel is a combination cock and ball ring with a connected vibrating anal plug, that can be controlled via a remote and, thanks to its 15-meter range, even by a partner.

The stretchable rings fit snug around the penis and testicles and effectively supports the erection through blood flow restriction. The inserted vibrating anal plug with its spiral texture and 10 varied vibration modes provides intense stimulation to the backdoor. The flexible connection strap nestles close to skin, offering additional stimulation to the perineum.

This clever silicon toy combo with a silky surface can be worn discreetly beneath clothes and for extended periods of time. For a unique feel, not only during sex but also in everyday life! It can even be used underwater, thanks to its waterproof design.

Rechargeable â€“ USB cable and battery (CR2032) for the remote control are included.
